# measurable·energy

Small power, big savings

In site accommodation, small power accounts for up to 95% of total electricity usage.

Around half of that is wasted due to devices left on or in standby.

95%

A solution that's simple, cost-effective and scalable

Identify
Know what devices you've got plugged in, where these are and what they're doing

Measure
See how much energy you're using and carbon you're emitting

Reduce
Automatically turn your devices on and off to save money and minimise your environmental impact

Kier Group achieved a:

6
month payback

59%
reduction in energy use

"We chose to implement the measurable.energy system because of the large amounts of wasted energy, energy cost and emissions, that came from our site buildings."

KIER | Head of Sustainability, Kier Group

eliminating wasted energy in buildings
